

```
class A {  
public:  
    void methodX(int i)  {  
        ...  
    }  
}
```

```
class B : public A {  
public:  
    void methodX(Color i)  {  
        ...  
    }  
}
```

surcharge

```
class C : public A {  
public:  
    void methodX(int i)  {  
        ...  
    }  
}
```
